1. INGREDIENTS

* This product is made with ingredients that come from Food companies in the east of Spain

➤ 85% Fresh Fish

85% only fresh fish. This meat is a source of natural benefits, with an important amount of high biological value proteins. Furthermore, is a natural source of fatty acids $\Omega 3$, $\Omega 6$, $\Omega 9$, EPA and DHA that help to keep a bright hair and skin and they are essential for tissues regeneration. Also, fatty acids help to reduce the risk of cardiovascular diseases. The fish meat contains complex B vitamins that protect the nervous system and are involved in metabolism that provides energy to the body for normal functioning. Fish meat also contains minerals like iron that is a vital component of haemoglobin, the molecule that transport oxygen around the body in red blood cells, and of myoglobin, which does the same job in muscle. Calcium and phosphorus are responsible for making bones structures rigid. Vitamin A, EPA and DHA are natural components that help to your pet to improve the visual acuity and particularly in adaptation to darkness. All these benefits will keep your dog healthier and stronger improving its quality life.

➤ 15% Legums sprouts

Legums sprouts provide to the organism a large number of benefits, it is a product rich in vitamins and minerals that provide low calories. It is a natural source of fiber and beneficial substances that help to reduce the risk of a large number diseases.

2. LATEST TECHNOLOGY APPLY FOR THE BENEFIT OF YOUR PET

➤ Benefits

Additional components in the final composition have been carefully studied to give an extra contribution of benefits to the animal in agreement with FEDIAF regulation,

- High % healthy fatty acids Ω3, Ω6 y Ω9

- Healthy and shiny coat

- Strengthens the immune system

- Helps to prevent articular degeneration

*Claims are shown in the bottom of this document.

➤ Tenderize Technology

This new technology provides the best snacks and quality treats for your dog. We apply a maceration, hydrolysis and cold dehydration processes of protein in our fresh meat.

Using our technology ("Tenderize Technology"), our products are a life quality synonyms for your dog, biological appropriate products with an excellent palatability. Products made and produced only with own juices.

➤ Safety and quality at each step of production. 0% chemical treatments.

A final product that ensure the quality due the control in each step of production. It is a process without chemical treatments; we only use physical treatments of advanced technology to guarantee total safety of any factor that may cause damage to food.

3. COMPOSITION

85% Fresh Mediterranean Fish (Fresh tuna, Fresh anchovy – *Engraulis encrasicolus*, Fresh swordfish – *Xiphias gladius*, Fresh horse mackerel – *Trachurus mediterraneum*, Fresh seabass – *Dicentrarchus labrax*, Fresh Silchard – *Sardina pilchardus*) Legums sprouts (Green Pea-*Pisum sativum*, White Pea – *Pisum* spp. and Lentils-*lens culinaris*), Glycerine Extract of *Yucca Schidigera*, Yeast extract *Sacharomyces Cerevisiae*, Taurine, Glucosamine, Chondroitin Sulphate. Natural Preservatives: Thyme and Rosemary.

4. ANALYTICAL COMPONENTS

MACRONUTRIENTS					
Protein (Min)	Fat (Min)	Fiber (Max)	Ash (Max)	Moisture (Min)	HC (Max)
30%	12%	0.8%	6.5%	22%	28.7%

OTHER NUTRITIONAL COMPONENTS							
Ω 3 (Min)	Ω 6 (Min)	Ω 9 (Min)	EPA (Min)	DHA (Min)	Taurine (Min)	Chondroitin Sulphate (Min)	Glucosamine (Min)
3.3%	1.8%	2.7%	0.5%	2.1%	0.13%	0.9%	0.7%

MINERALS				
Calcium	Phosphorus	Ca/P ratio	Magnesium	Sodium
1.11%	1.23%	1/1%	0.5%	0.37%

TRACE ELEMENTS			
Copper	Zinc	Iron	Selenium
1.6mg	11mg	11.6mg	45.3µg

VITAMINS				
Vitamin A	Vitamin D ₃	Vitamin E	B complex	Vitamin K
52Kiu	3Kiu	720IU	350mg	120 µg

5. MICROBIOLOGICAL DATA

Microbiological parameters	Units	Results	Method
Detection and recount on plate count of presumptive Enterobacteriaceae	UFC/g	< 10 (LOD)	NF V 08-054:2009
Research in Salmonella spp.	In 25 g	ABSENCE	QMP_504_AI_51_11_x

Explanation: the symbol "< (LOD)" before the result, means that the value which is obtained is below the detection limit.

The analysis of the product was made by Laboratorio Agrolab.
